BRENTFORD COMMUNITY STADIUM

Client: Buckingham Group
Tonnage: 2600T
Completion: Current

The Brentford Community Stadium project is a 17,000-seat capacity stadium for Brentford Football Club. This is a community stadium and the new focus is to bring together Sports, Education and Commercial uses.

Included in our scope of works was large-span structural steel fabricated trusses and installation of pre-cast terrace units and stairs including metal floor decking.

The stadium comprises of 4 stands (North, South, East & West) and is 4 stories tall. It has a 1500m^2 outside broadcast facility to be Premier League compliant from day one.
